**Example: FD4-41SPSC-PT**

Description: 12"x12"x6"D Square Top Drain, W/ 4" Sch10 Outlet, Standard Perforated Basket, Standard Solid Cover, W/4" Sch10 P-Trap welded to drain, T304 SS

### Rules to Follow when Creating Part Numbers

- You **MUST** have the first 10 characters including the first "--"
- Anything after those first 10 will be followed by a "--" and then the characters that correspond with what type of drain you are building. It is important to read this chart from left to right.
- The left most columns are the required fields with the characters showing the types of drains. The column on the right are all the accessories that can come with a drain but the column on the right is not required if your drain does not need those options.
